PROFESSIONAL SUMMARY

Results-driven **Frontend Developer with 5+ years of experience** building scalable, high-performance web and mobile interfaces. Specialised in **React, Next.js, and Angular**, with a strong command of TypeScript, Tailwind CSS, and RESTful API integration. Proven track record of delivering pixel-perfect, accessible UIs that accelerate development cycles and elevate user experience across industries including fintech, healthcare, and e-commerce. Passionate about clean architecture, component reusability, and shipping products that make an impact.

CORE SKILLS

Frameworks	React.js (Hooks, Context API, Redux) · Next.js (SSR / SSG / ISR) · Angular
Mobile	React Native · Expo Go · Responsive & Adaptive Design
Languages	JavaScript (ES6+) · TypeScript · HTML5 · CSS3
Styling	Tailwind CSS · SCSS / Sass · Material UI · Bootstrap
API Integration	RESTful APIs · GraphQL · Axios · Fetch · WebSocket
Version Control	Git · GitHub · GitLab · CI/CD Pipelines
Testing	Jest · React Testing Library · Chrome DevTools · Postman
Cloud & Deploy	Vercel · Netlify · AWS (S3, EC2) · Heroku
Tooling	Webpack · Vite · Babel · ESLint · Prettier · VS Code
Methodologies	Agile / Scrum · Component-Driven Development · Accessibility (WCAG)

WORK EXPERIENCE

Frontend Developer (Full-Stack Team)

Mar 2025 – Present

Goldtech ICT Hub — Lagos, Nigeria

- Architected and delivered React / Next.js frontends for web platforms, improving page load performance by 30% through code-splitting and lazy loading.
- Built mobile-responsive, real-time dashboards with React Native and Tailwind CSS, empowering 6,600+ mobile businesses with live operational insights.
- Developed a reusable component library with React and Tailwind CSS, accelerating UI development cycles by over 25% across multiple product squads.
- Integrated RESTful and GraphQL APIs, enabling seamless data flow between frontend applications and Node.js backend services.
- Designed and shipped an internal admin panel with Next.js, featuring real-time error tracking and user analytics dashboards.
- Led front-end architecture decisions in Agile sprints, conducting code reviews and mentoring junior developers on best practices.

Frontend Developer
Aug 2023 – Sep 2024

Torbita Global Info Tech Services — Abuja, Nigeria

- Built a mobile analytics dashboard with React Native and TypeScript that increased user engagement tracking capability by 40%.
- Developed and maintained multiple web UIs with React.js, integrating RESTful and GraphQL APIs deployed on AWS and GCP.
- Optimised bundle sizes and API call strategies, reducing frontend response times by 30% across production applications.
- Participated in cross-functional sprint planning and QA processes, managing tasks through Jira and ensuring production-ready releases.
- Conducted code reviews, enforced ESLint/Prettier standards, and managed Webpack/Babel build configurations for team-wide consistency.

Frontend Developer
Nov 2022 – Jul 2023

Seam Health Group — Lagos, Nigeria

- Designed and built user-facing features for healthcare web applications using HTML5, CSS3, and Bootstrap, delivering a 15% uplift in UX satisfaction scores.
- Led a successful migration from AngularJS to React, refactoring a financial application with improved state management and component architecture.
- Built Angular single-page applications integrated with backend APIs for data fetching, user management, and admin dashboard functionality.
- Reduced internal tool latency by 20% through performance profiling and targeted frontend optimisation.
- Created technical documentation and ran coding workshops, raising team standards around tooling and best practices.

Frontend Developer
Oct 2020 – Sep 2022

Imprinno Solutions — Lagos, Nigeria

- Delivered frontend integrations between Moodle, Salesforce, and CardPointe using JavaScript, improving operational data flow and client onboarding efficiency.
- Collaborated with cross-functional teams at Web Loft Designs to build and optimise API integrations using Google Apps Script.
- Maintained and enhanced legacy JavaScript applications supporting internal training platforms.
- Ensured reliable operation of educational tool integrations, coordinating with IT teams on data management and academic assessment systems.

SELECTED PROJECTS

Portfolio Website (Next.js · TypeScript · Tailwind CSS) oghenekaro-delta.vercel.app

Personal portfolio with Web 5 aesthetics — custom cursor, glitch animations, typewriter effects, animated skill bars, and responsive project showcases. Deployed on Vercel.

Real-Time Analytics Dashboard (React · TypeScript · Tailwind CSS · WebSocket)

Live business intelligence dashboard serving 6,600+ users with real-time data sync, interactive charts, and role-based access control.

Mobile App (React Native) (React Native · TypeScript · Expo)

Cross-platform iOS & Android application with offline-first data sync, custom navigation, and integrated AI-generation features for an MVP product launch.

EDUCATION

Bachelor of Science — Economics
Jan 2016 – Dec 2020

National Open University of Nigeria, Lagos
